Handy and powerful:

The units of our NG series are technically finished, fair in consumption and variable in use inside rooms with ventilation.

Type NG 35 - 100

Fully automatic with electric ignition and ionisation flame control. Uncomplicated connection possibility to use a room thermostat via plug connection.

Included to delivery is a gas hose with pressure control (gas bottles 5.0 - 33.0 kilos).

Heating capacity can be chosen variably within the stated range.

All units are optimally intended for frost-free maintenance of building sites and are often used for grain drying in agriculture.
